

Infrastructure

Increase agility, increase capability, reduce management overheads and preserve capital

Over the past decade, cloud has evolved into the premium solution for modern IT infrastructure. By removing the burden of implementing new hardware, networks and applications, cloud resources can be more agile, enable access to capability at a lower cost point, reduce management overheads and preserve capital.

Cloud technology provides seamless access to advanced infrastructure hosting capability for a simple monthly fee. Together with inherent economies of scale, this pay-as-you-go model makes it affordable for companies of all sizes to compete on a level playing field.

By utilising cloud solutions for your business, you have rock solid capability and complete flexibility to add or remove resources whenever you need to. Also, because your solution is hosted and managed offsite, you free up your internal IT team to focus on projects and activities which move the business forward, rather than keeping the lights on.

Leverage our expertise in multi-cloud models

experteq has been providing cloud and managed services to the heavily regulated financial services industry for over 30 years. Through our experience we'll provide a flexible solution that increases your agility and enables you to focus on your business whilst we take care of the IT infrastructure.

We currently support only Financial Services clients and our record of delivering secure, compliant and highly available solutions is second to none. experteq solutions are aligned with APRA CPS 234 and are PCI-DSS compliant, so you can be confident of meeting regulatory requirements for business continuity, risk mitigation and data security.

Managed public cloud

Boost your capacity on demand and access transformative business productivity tools

As a Microsoft Partner, experteq provides access to the highly secure and capable Azure Cloud platform.

Through simple connectivity, our public clouds models are the fastest and most cost-effective way to boost your system's capacity and enhance connectivity across your entire organisation.

Featuring in-built security, Microsoft Azure cloud offers far more protection than most on-premises data centres.

experteq public cloud snapshot

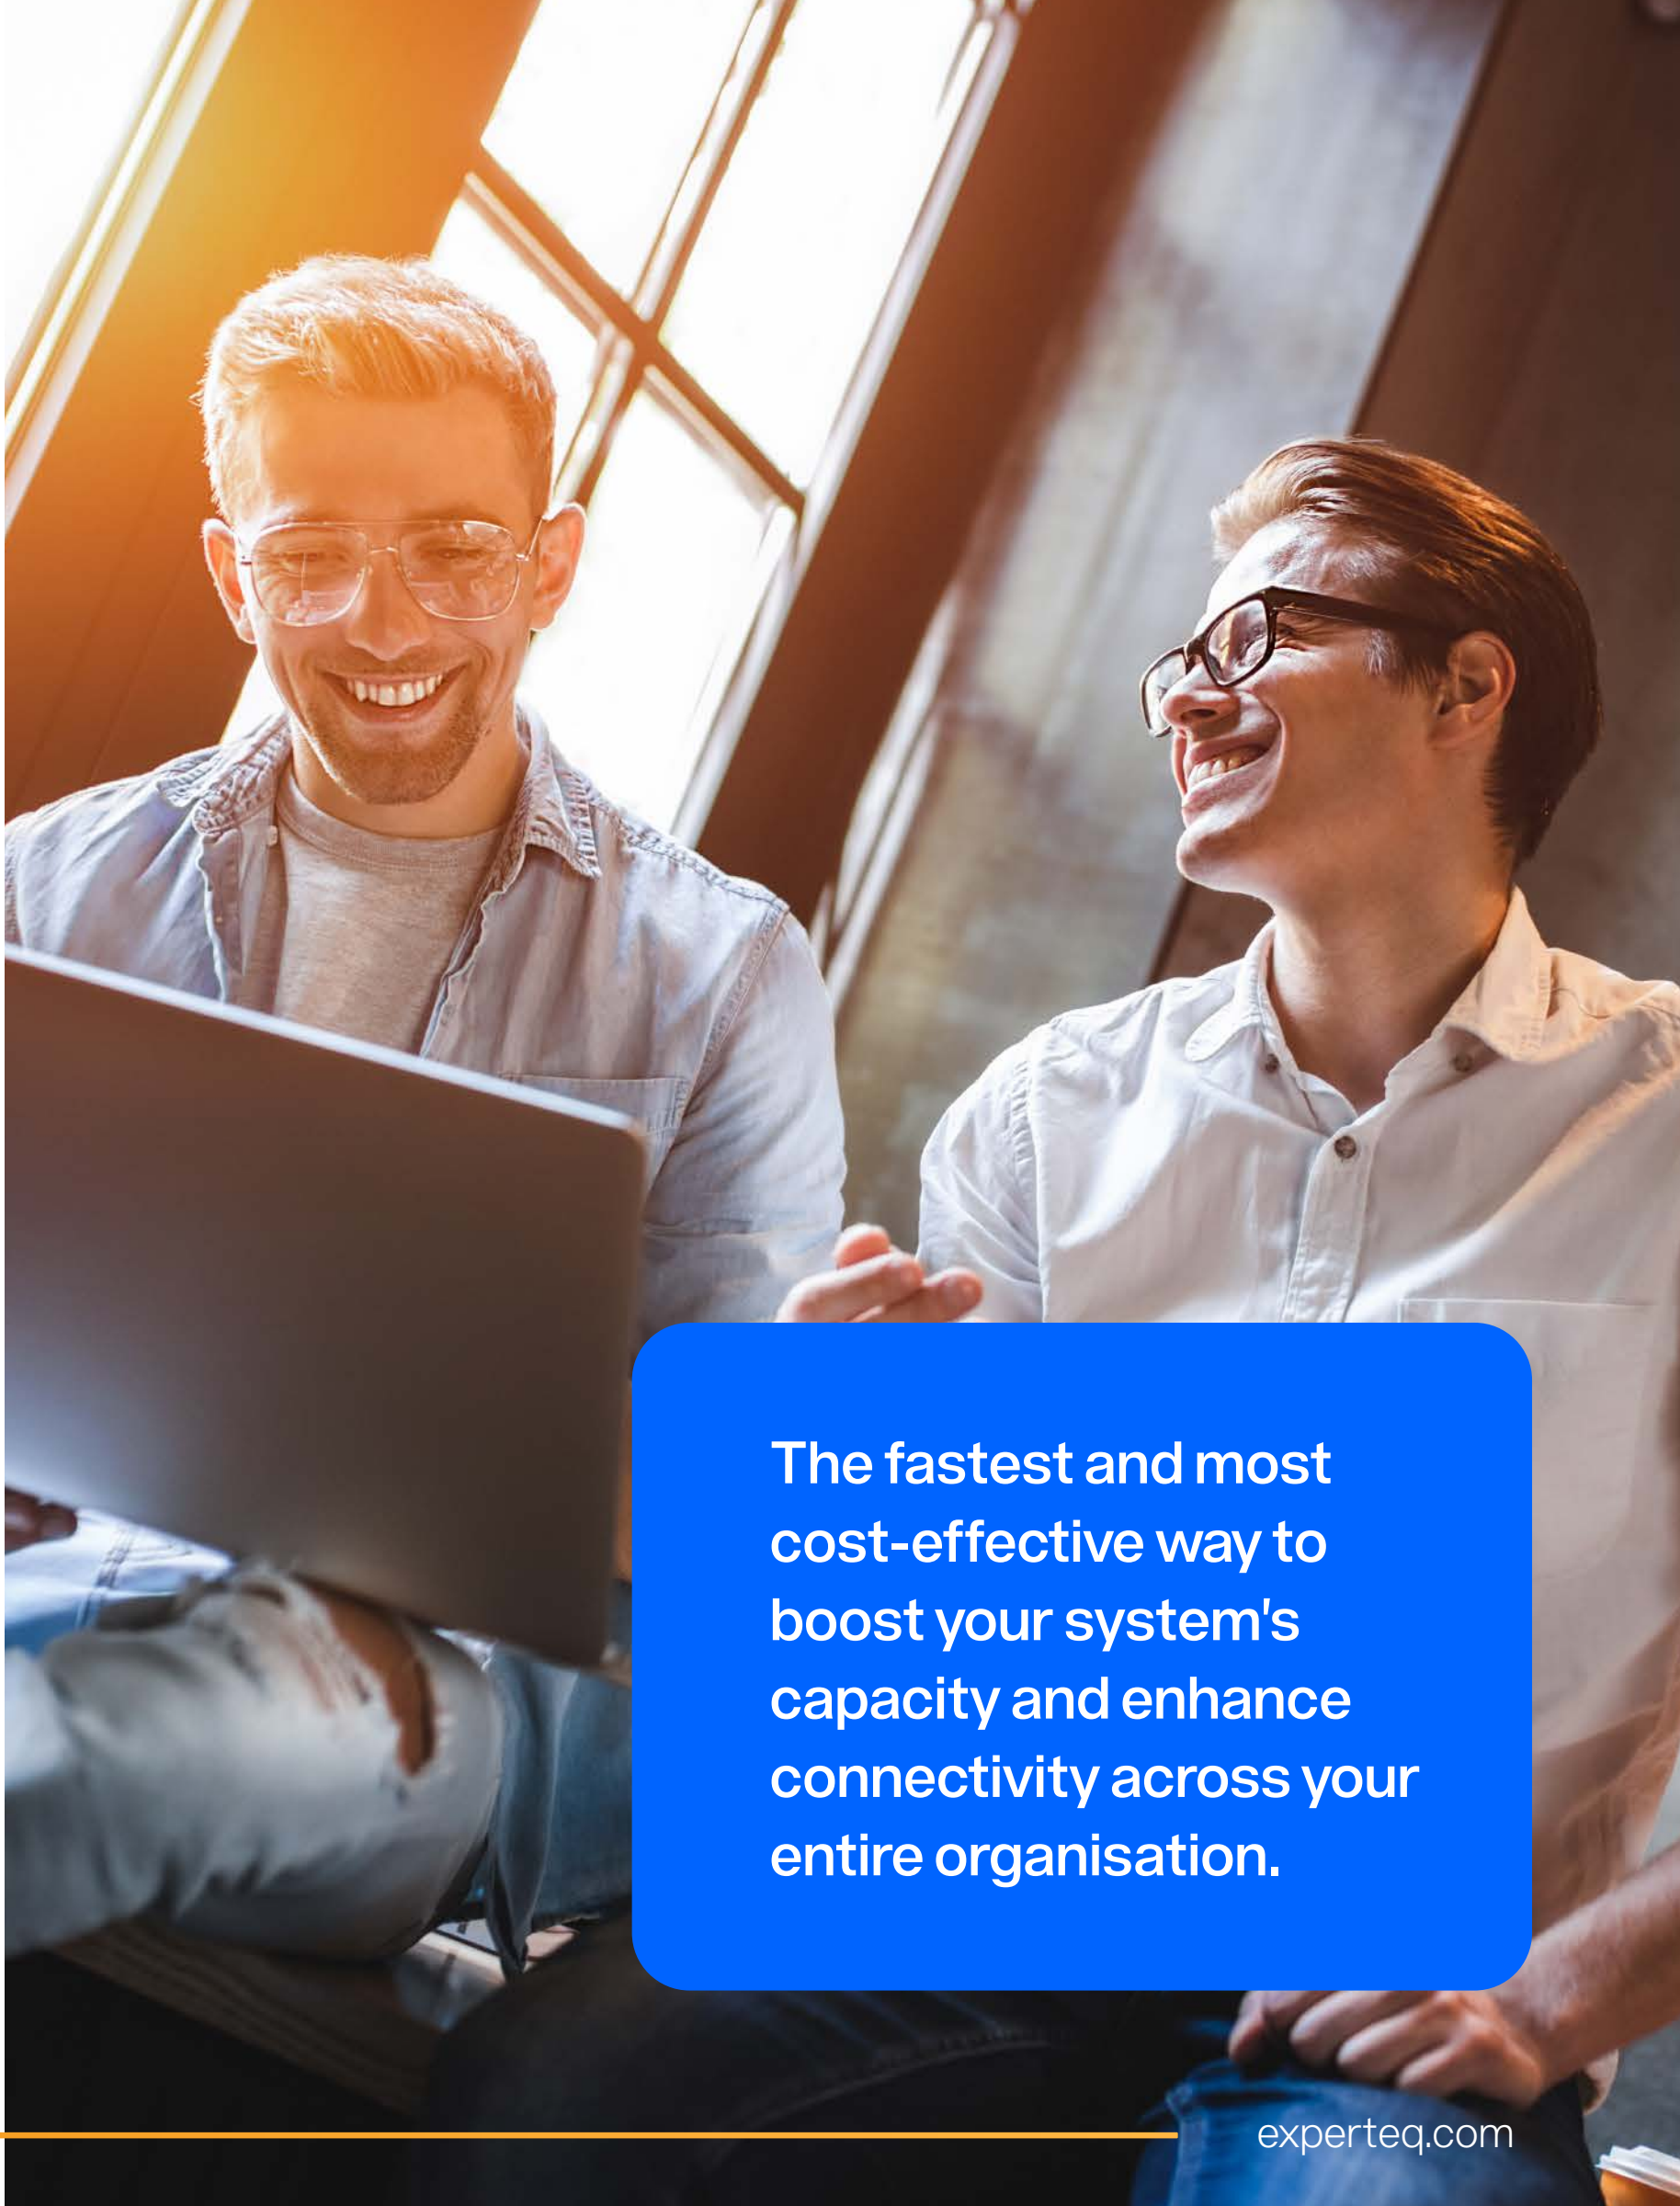

- ✓ Fully managed service
- ✓ Leading Microsoft Azure platform
- ✓ Elastic capacity
- ✓ Ease of integration
- ✓ Vast economies of scale
- ✓ Optional experteq management
- ✓ Subscription-based applications
- ✓ Built in machine learning
- ✓ Powerful query languages

This is complemented by our managed services that can add an additional layer of security through vulnerability scanning, penetration testing, logging, patching, authentication, segregation and monitoring.

With experteq public cloud there's no need to estimate what your future requirements may be as you can increase capacity on demand. You also have access to a suite of additional services that include advanced business productivity tools, powerful analytic capability, AI and machine learning functionality.

Transform your business

- ✓ Increase agility
- ✓ Increase your capabilities
- ✓ Enhance your performance
- ✓ Integrate more easily
- ✓ Access leading applications
- ✓ Minimise your disruption
- ✓ Enhance your security
- ✓ Meet your objectives
- ✓ Increase your productivity

The fastest and most cost-effective way to boost your system's capacity and enhance connectivity across your entire organisation.

Combine the security of private networks with the power and cost-efficiency of public cloud resources.

Managed hybrid cloud

Combine public and private cloud into a tightly integrated hybrid solution

The experteq hybrid cloud solution offers the best of both worlds.

By combining the security and capability of a private cloud with the scalability and cost-efficiency of a public cloud, a hybrid cloud solution allows you to increase capacity whenever you need to, while helping you meet all regulation and compliance demands.

Through our experience we'll review existing applications and migrate these to the most appropriate solution including SaaS, PaaS, Public Cloud, Hybrid Cloud and Private Cloud. This ensures that the end state solution is configured for enhanced performance, security and return on investment.

experteq hybrid cloud snapshot

- ✓ Fully managed service
- ✓ PCI compliant
- ✓ Flexible configurations
- ✓ Cloud-burst elasticity
- ✓ Banking grade security
- ✓ Contractual protection
- ✓ Seamless integration
- ✓ Optional management

Transform your business

- ✓ Increase your flexibility
- ✓ Complement existing resources
- ✓ Enhance your capacity
- ✓ Extend your capability
- ✓ Migrate more easily
- ✓ Contain your costs
- ✓ Increase your security
- ✓ Assure your compliance

Managed private cloud

Simple access to the world's most advanced infrastructure technology

In the Financial Services industry, where data security is paramount, the experteq private cloud offers a reassuring level of protection.

Our solutions have been developed to meet the stringent demands of Australian Banking, Financial Services and Insurance (FSI) organisations and their regulators APRA and ASIC. The experteq private cloud is hosted in dedicated environments within Australian data centres.

The experteq private cloud can seamlessly integrate industry-specific financial services technology and offers complete peace of mind through secure network connectivity, security processes, around-the-clock monitoring and contractual obligations that guarantee availability and data security.

With experteq private cloud your business is also supported by a deep technical and industry knowledge and capability on a 24x7 basis. Through our knowledge we'll help you plan a solution that meets your business requirements and we'll take care of every aspect of your solution—from migration through to management and ongoing optimisation.

experteq private cloud snapshot

- ✓ Fully managed service
- ✓ Secure network connectivity
- ✓ Unrivalled platform
- ✓ Dedicated environments
- ✓ PCI-DSS compliant
- ✓ Banking grade security
- ✓ Contractual guarantees
- ✓ Integrated FSI applications

Transform your business

- ✓ Increase agility
- ✓ Increase your capabilities
- ✓ Preserve your capital
- ✓ Reduce your administration
- ✓ Enhanced your security
- ✓ Increase your availability
- ✓ Boost your performance
- ✓ Embrace new strategies

The experteq private cloud is hosted in Australian data centres and is protected by our security processes, procedures and around-the-clock monitoring.

Find out how you can accelerate your performance while containing your costs.

Talk to us today about your business requirements and we'll undertake a technical assessment and provide you with recommendations for your organisation.
