

Project success story

Microsoft 365 Security and Compliance

Industry

Financial services

Employee

51 - 200

An Australian-owned, globally operating FX and CFD services provider required us to complete a Proof of Concept (POC) to implement security compliance using Microsoft 365 E5.

Challenges

- ✓ The existing antivirus technologies were proving to be difficult to manage
- ✓ Mobile device management was not secure for both BYOD and corporate-owned
- ✓ Multifactor authentication (MFA) was proving to be cumbersome and was not configured for all users
- ✓ The customer was subject to compliance under both Mandatory Data Breach and GDPR legislation

Benefits

- ✓ Improved the overall end-user experience
- ✓ Enabled BYOD for company data access
- ✓ Allowed core Azure Information Protection capabilities for data protection and to meet the security requirements for data classification
- ✓ Greater security control with the ability to remotely wipe company data, lock, or passcode reset both company-owned and personal devices
- ✓ Improved security posture through MFA and Identity access

Solutions

- ✓ Deployed EMS E5 which includes intuitive MFA, mobile device management for BYOD, and conditional access policies
- ✓ Implemented Windows Advanced Threat Protection for endpoint protection
- ✓ Implemented BitLocker to enable hardware encryption of Windows 10 devices
